\$32.75

### WHISKY USED TO CHECK SPREAD OF INFLUENZA

Prescribed by Alexandria Physicians in Conjunction With Other Remedies.

ALEXANDRIA, Va., October 5.—Whisky taken from "bootleggers" by state prohibition officers and members of the police force is being used to help to check the spread of Spanish influenza here.

Some physicians have recommended that whisky be taken in small quantities in hot water along with other medicine. This being a "dry" city it was impossible to obtain liquor. A few druggists only had whisky on hand and they, of course, had a license to sell it only on physicians' prescriptions. Their supply soon was exhausted.

Recognized as Emergency. Owing to the extreme necessity of having whisky the authorities have turned over a certain quantity of the contraband liquor to the licensed druggists and this, of course, is given to customers only on prescriptions. Today, however, the impression went around the city that persons suffering from the influenza could obtain whisky simply by applying at police headquarters. As a result the police were besieged with personal calls and also with calls over the telephone making inquiries as to how to obtain some of the contraband liquor.

Erroneous Impression Corrected. The police soon dispelled the illusion, informing inquirers that whisky for such cases could be obtained only on physicians' prescriptions from druggists having the required license to sell liquor.

MRS. JESSIE A. ROBINSON DIES

Victim of Influenza, Which Recently Proved Fatal to Soldier Son.

Mrs. Jessie A. Robinson, wife of George W. Robinson of the government printing office, whose son, Harold Robinson, died at Camp Lee, Va., from the effects of Spanish influenza, died at her home, 2012 Franklin street northeast, Friday from the same disease. It is believed she contracted influenza while nursing her son at Camp Lee.

Young Robinson was taken ill September 3. His mother and father at once went to his remaining there until his death. He was interred in Arlington cemetery September 23. Upon her return home Mrs. Robinson became ill. She sank rapidly until her death.

She is survived by her husband, one son, Wilton Robinson, and two daughters, Mrs. Mamie Keifer and Miss Helen Robinson. The family formerly lived in Michigan.

MALADY AMONG MIDSHIPMEN

Over 800 Cases of Influenza Developed Within Ten Days.

ANNAPOLIS, October 5.—Over 800 midshipmen, more than a third of the whole number, have been touched by the prevailing malady, Spanish influenza, during the last ten days. Serious consequences have been averted by the prompt and efficient action of the medical officers, assisted in every way by Supt. Eberle.

At present the new cases are almost negligible, while the patients are being returned to duty in large numbers. Only one case of pneumonia, the most dreaded after effect, has developed, and this youth is in excellent condition.

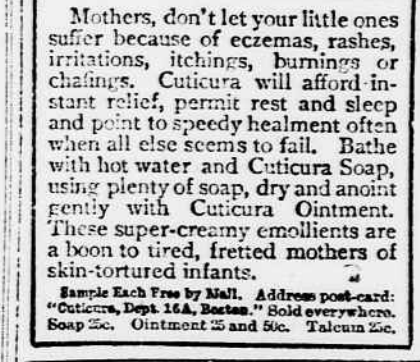

The members of the two upper classes, who have just returned from leave, were the chief sufferers. Underclassmen, who stayed at Annapolis, were affected only to a much smaller degree.

Every suspect was given prompt attention and isolation, so that the illness was strictly limited. Steps were taken to prevent the grouping of midshipmen as much as possible and a quarantine of the academy grounds established.

### Ringworm—Scalp Sores

If you want speedy help try D. D. D. Prescription. So easy to apply, not greasy or messy. It washes into the scalp and the relief is instant. Try it today. It is guaranteed 35c, 50c and \$1.00.

Write: Each Free Mail. Address post-card: "Cuticura, Dept. 144, Boston." Sold everywhere. Soap 25c. Ointment 25c and 50c. Talcum 25c.

### INFLUENZA SPREAD NOT YET CHECKED

Officials Expect Results in a Few Days From Hard Fight Being Conducted.

Reports received in Washington yesterday by civil and military authorities indicated no let-up in the influenza epidemic throughout the country. Officials believe, however, that precautions taken in all states affected will show results within a few days.

No figures were available at the public health service to show how the disease increased among civilians. The War Department announced that 17,353 new cases were reported by camps and army stations yesterday.

Deaths From All Causes.

Deaths from all causes in the Army yesterday totaled 652. It is believed influenza was responsible for a large percentage of the number.

The cases reported by camps in and around Washington yesterday follow: Camp Meade, 1,644; Camp Meigs, 241; Camp Humphreys, 122. Camp Custer was hardest hit yesterday, with 2,556 cases. Camp Meade was second and Camp Taylor was third with 1,587. The total number of cases reported by all camps since September 13 is 14,895.

The figures given out last night show that pneumonia is far less prevalent in the camps than influenza. Only 2,141 cases of pneumonia were reported yesterday.

The American Red Cross, which sent a number of nurses to the camps, Mass., where the epidemic has been the most widespread, yesterday received information that the situation at that camp is now well in hand and that the nurses can gradually be withdrawn and assigned to civilian needs.

To Get Canadian Nurses.

The demand for nurses has increased so rapidly because of the disease that the Red Cross last night announced that Canadian nurses will be enlisted for service in the United States. A Canadian committee on nursing service has been organized, and a call has been sent to Canada for 200 graduate nurses to be sent to Boston and twenty-five for duty in Washington.

Reports received by the Red Cross from the middle west show more than 400 nurses have been supplied by the organization to meet the emergency.

### Compliance With Church Closing Order Approved by Pastors' Federation

Compliance in both the letter and spirit of the request of the District Commissioners to close the churches of Washington today to prevent the spread of influenza was expressed at the meeting of the Pastors' Federation of Washington yesterday at the New York Avenue Presbyterian Church.

A resolution, expressing the unanimous feeling of the pastorate of Washington passed at the meeting, follows: "Resolved, in view of the prevailing condition of our city, the widespread prevalence of influenza, that has called forth the request from the District of Columbia Commissioners for the temporary closing of all churches; we, the Pastors' Federation, in special assembly, do place ourselves on record as cheerfully complying with the request of the Commissioners, which we understand, applies to all churches alike. We further recommend that all people shall conduct in their own homes some form of religious worship, remembering that especially the sick, our allied nations at war and the present canvass for the fourth liberty loan."

Closing Held to Be Imperative. John G. Capers, chairman of the speakers committee for the fourth liberty loan, explained the situation, when the point was raised that churches of other denominations might not comply with the request, that the request came from even higher authority than the District Commissioners, and that it is the opinion of Surgeon General Blue of the United States public health service that the churches be closed. In Boston, Mr. Capers explained, the churches were not closed during the first few days of the epidemic, and now civic authorities in Boston realize that even outdoor meetings must be canceled and any gathering of any kind discouraged.

Dr. Wallace Radcliffe of the New York Avenue Presbyterian Church took the stand before the Commissioners are not getting at the root of the matter by ordering the churches closed, and that the government departments should be closed first.

CONGRESS LIBRARY CLOSED.

Public Denied Admittance During Prevalence of Influenza.

By order of public health officials the Library of Congress has been closed to the public until further notice. The order does not apply to members of the Senate or House or to the few officials of the government who by law are accorded the right to draw books.

Officers and enlisted men of the Army and Navy and civilian employees of the government will be given no special consideration in each instance of a letter from the commanding officer of head of the department concerned, advising that the leave, by name, requires for official purposes the right to use the Library collection.

Employees of the Library have been ordered to report for duty as usual.

MORE MEETINGS POSTPONED.

Further announcements of postponed meetings on account of possible spread of influenza have been made as follows: The Women's Foreign Missionary Society of Foundry M. E. Church has been indefinitely postponed.

The Signal Corps emergency committee has postponed its regular monthly meeting.

The regular October meeting of the Principals' Association of the white graded schools has been postponed indefinitely.
